

AccuRator M3

Patent Pending

Perfectly blends up to 3 ingredients with water

The AccuRator M3 is a fully-integrated mixing system. It blends up to 3 ingredients while simultaneously metering water to deliver a uniform batch of product. Integrating advanced CFV technology, the AccuRator M3 delivers exceptional accuracy, and automatically monitors and tracks consumption over time.

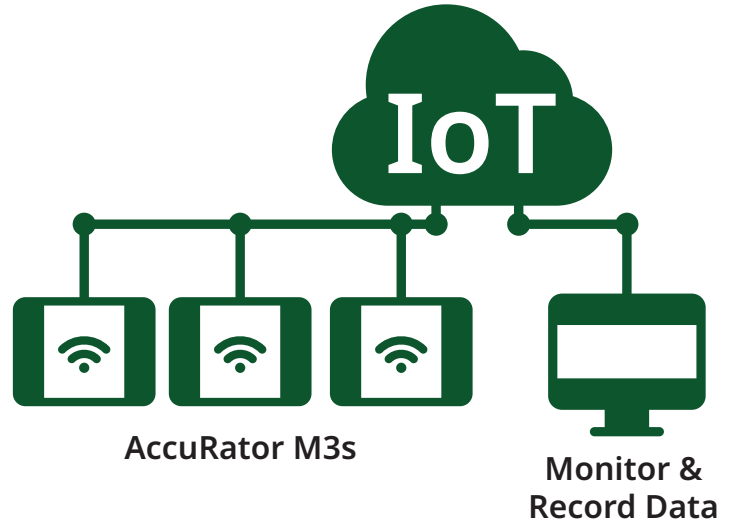

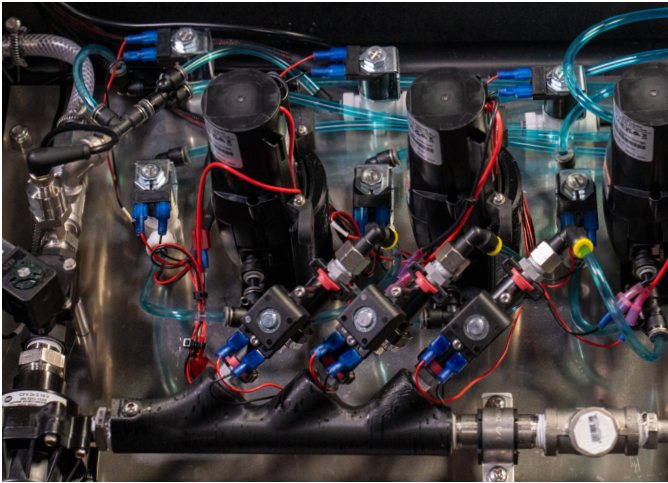

PRODUCT FEATURES

- Plug and play, no component assembly required
- Formula-driven with tablet controller
- Auto-calibration to manage a wide range of fluid viscosities
- Ingredient and water out detection
- Clean-in-place with integrated system flush
- Configurable ingredient consumption reports

FULLY AUTOMATED MIXING

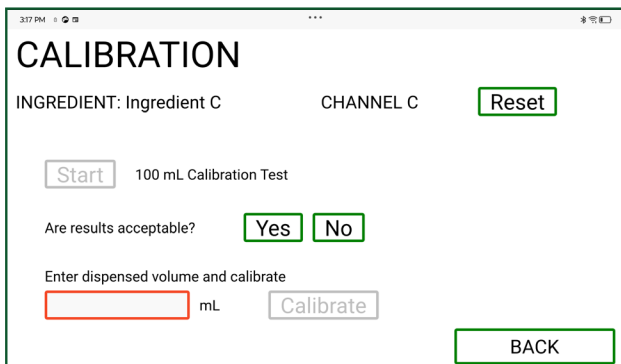

The AccuRator M3 is fully IOT compatible. Mixing formulas can be controlled centrally and executed by local technicians. The Accurator M3 maintains a detailed record of ingredient usage with reporting tools that support efficient inventory management.

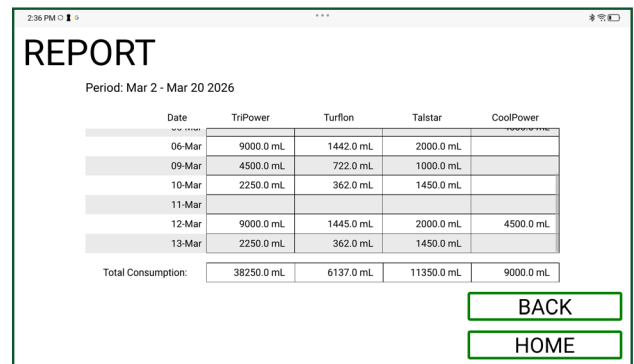

Menu-driven interface for ease of operation

Handles multiple formulas – makes any size batch

Manages a wide range of viscosities

Detailed reports and summaries
